## 1° STAGE

• Unmount 2 plates showed in image. Then unmount eletric box, and lay it down making attention, because it can damage painting.

## 2° STAGE

- Unscrew 4
   screw that
   stop display
   box.
- Then, unmount the display box.
- Unscrew 2
  screw showed
  in images and
  replace the
  display board
  (there is 4
  screw behind
  box grey part)

## 3° STAGE

- Mount the display box and electric box.
- Now replace
   Main board as
   show in
   image
- Look next step to watch how connect right cable.

## Don't touch connectors in 2 boars.

There is the specific connector for every cable in the middle of it

- S1= probe water temp.
- S2= probe condenser copper temp.
- S3= ambient temp.
